

VERTICAL **LIFT GATES**

Looking for a combination of style, security and durability for your next project? Davis Door does the heavy lifting. Our innovative Vertical Lift Gate is an aesthetic upgrade to any multi-family or commercial building. Designed for over **1 million cycle usage** with a **five-year warranty**, this gate provides security and peace of mind for your clients.

MAIN ADVANTAGES

ADAPTABLE DESIGN

- Multiple finishes and sheeting options to enhance your building design
- Able to accommodate extra wide openings or sloping ground conditions
- Maximum airflow makes the door an efficient part of the building's exhaust system
- Whisper quiet operation

SPEED AND SECURITY

- High-speed. 24"-36" per second opening speed
- Anti-lift devices prevent unwanted access
- Safety devices standard on all doors

RELIABILITY

- 1 million cycle guarantee, five-year warranty
- Innovative design eliminates common industry wear parts
- Built to last with welded aluminum panels

THE DAVIS DOOR DIFFERENCE

Our family-owned company is known for providing the best customer service in the industry. Ask around.

Davis Door has developed the Vertical Lift Gate over decades. We observed failure points of other high-use doors and designed a door without springs, rollers, or other common wear parts.

EXPLORE
Vertical Lift Gates

WHY ARCHITECTS CHOOSE DAVIS DOOR:

DESIGN FLEXIBILITY - Complements your building design with a wide variety of exterior material and finish options

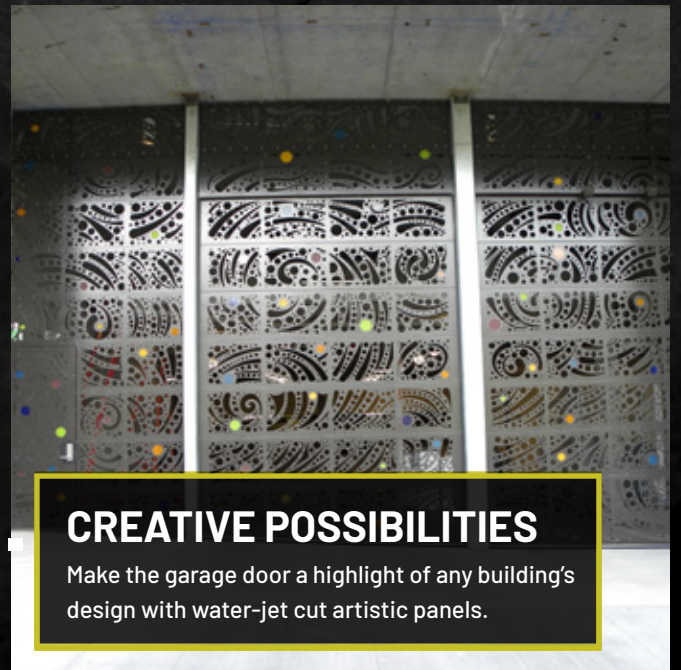

AIRFLOW - Serves as an efficient part of the building's exhaust system

SAFETY - High-speed opening, light curtains, monitored contact sensing, and other safety features

DURABILITY - Built to last with aluminum panel lifts; soft start/stop technology; and no hinges, springs, rollers or cables to break down

DESIGN FLEXIBILITY

The Vertical Lift Gate can be built to accommodate extra wide openings or extreme sloping conditions.

CREATIVE POSSIBILITIES

Make the garage door a highlight of any building's design with water-jet cut artistic panels.
